

## **Creative Director Meeting:**

### **Notes on Revised Mockup**

- Maybe add nav bar for below the header section
- No four seasons idea, just Summer and Winter\* Show contrast through color or general content to distinguish between summer and winter activities/ culture
- Long scroll but the nav bar should help!
- Switching the culture and climate section
- Color palette, and imagery is great- just carrying it over into the HTML
- Adjustments to mobile version are working well- think forward to potential difficulties in building out the grid

### **Technical Notes on HTML Building**

- Building with a grid or columns for the images and section heads?
  - Columns could work better for the desktop version but need something for the mobile version that works as well
- Making sure the shapes translate for the section heads
- Nav bar under the header section may just need a bit of space (add margins to provide space for the bar)
